TOLL HIGHWAY ON MIAMI CANAL BANK PROMOTERS' PLAN

Say They Will Build 75
Mile Stretch To Lake
In Two Years

RIGHT OF WAY HAS
BEEN SECURED

Miami Paper Says Com-
pany Will Take Over
Miami Canal

MIAMI, Fla., June 14.—The Miami Herald says today:

Construction on the Miami and Tampa Highway which is to extend northward from Miami, following the Miami canal to Lake Okechobee and then to the north, will be started within three weeks, according to R. M. Williams, vice president and general manager.

The plans call for an expenditure of \$10,000,000 and \$200,000. The first link of the road, which is from Miami to Lake Okechobee, will be 72 miles and will pass through a rich portion of the Everglades. Arrangements have been made to take over the Miami canal and put it in condition for navigation from the Pennsylvania sugar plantation to Lake Okechobee.

By finishing the Miami canal it would then be possible for the opening of commerce to all points on Lake Okechobee and to a number of towns and cities along rivers and other canals. One of the farthest points would be Fort Myers. This would make it possible for thousands of acres of the back country to be developed as both water and land highways would be extended to sections that have never been reached.

The Miami and Tampa Highway Company has been working on the proposition for several months and recently completed plans. A number of surveys have been made, right-of-way obtained and the plans made to begin work early in July.

Promoters of the Miami and Tampa Highway Company are widely known in Miami and throughout Florida. Several of them are already interested in developing the back country and have other projects well under way for promotion of their plans.

William C. Wolfe, president of the Planters Bank, Orangeburg, S. C., and who was associated with the Tatum Land Company in their purchase of a large tract of Everglades land in the state several years ago, is president of the company. F. W. Symmes of Miami is vice president. S. M. Tatum is treasurer. Frank H. Haskell, assistant treasurer, and Leonard A. Bennett, secretary. The directors are John J. Quinn, Frank Clarke, S. M. Tatum, E. R. Graham, Vance W. Helm, Dr. John R. Pearson, W. D. O'Donnell and J. S. Waramaker. S. M. Tatum is president of the American Cotton Association. The general counsel is the firm of Shotts & Matthews.

The highway will be built in accordance with specifications used by the state road department. It will be a toll road but may be taken over by the state later on. It will conform to the scale of tolls charged by other roads in this state. A 100-foot right of way has been obtained and the plans call for a 24-foot surfaced road.

Three right-of-ways out of Miami are under consideration. The plans call for the highway to start at the Miami city limits and extend through the Pennsylvania sugar plantation to a distance of the first 10 miles the highway will have a double roadbed, with 24 feet on each side of a parkway in the center.

While the highway is to follow the course of the Miami canal, and probably will use portions of the rock from the canal for foundation, the plans call for the construction to go through the best portions of the Everglades, making it possible for thousands of acres to be ditched, ditched and drained for farming purposes.

In connection with the Miami and Tampa Highway Company, a general land development plan has been formed under the laws of the state of Florida for the purpose of preparing the Everglades for development. It is said that no undeveloped land will be sold and that only tracts ready to be irrigated or to be used for raising of poultry or hogs will be put on the market.

For nearly four years Mr. Wolfe has been interested in building a highway from Miami to Lake Okechobee. For the last five months Mr. Wolfe and others, associated with Mr. Wolfe and others, have investigated conditions around Lake Okechobee and in the

MR. HUNTER SEEKS DEEDS FOR LANDS TO 17-FOOT LEVEL

Resident of Pahokee on
Important Mission To
Tallahassee

MAKES REPORT OF
WHAT HE LEARNS

First of Series of Let-
ters of Interest To
All Claimants

By THOMAS HUNTER.

TALLAHASSEE, Fla., June 10.—This letter should be of direct interest to owners of lots beside Lake Okechobee who are desiring title deeds from the State of Florida for the shoreline between their property and the 17-foot lake level.

As one of these owners myself with lot or lots situated in section 13, Pahokee, and on behalf of my neighbors similarly situated in sections 13 and 18, Pahokee, I am here in the capital city to get desired information and to give any needed and in completing the sale by the state which was decreed by the trustees of the internal improvement board during their visit to the Lake Okechobee region last June.

On Monday morning, June 7th, I called on the drainage engineering office, Chief Drainage Engineer Fred C. Elbert told me that maps, surveys, descriptions and questions relating to land sales by the state have been taken up of his department and have been given over to the recently created engineering department under the supervision of A. R. Richardson, C. E., chief field agent for the internal improvement board, assisted by T. Byrd, C. E.

Mr. Richardson's office is on the ground floor of the capitol building located between the offices of the engineering department and of the secretary of the internal improvement board. By appointment made I interviewed Mr. Richardson on the afternoon of the same day. Mr. Richardson has in his department the maps and other papers bearing on these Lake Okechobee shoreline transfers. In answer to my query as to the obstacles in the way of the completion of the transfers of lake shore pieces of land from the state to the upland owners, Mr. Richardson said that he was waiting for the original recorded plat of Ridgeway section 18, and that he needed a plat of section 13, and a plat of section 18, in making each of these two plats, the figures of distance and area as determined by our surveyor and containing the lot boundary lines to the farther out 17-foot lake level line shown in Assistant Drainage Engineer, Glenn V. Scott's map.

Mr. Scott's map is the result of his checking of the survey made by the surveyor. The resulting altered plats will be the final plats. In these plats will be the number of acres and the area of each lot. This making possible the simplest and most definite legal description for each piece of shoreline to be decreed by the state. Record plats, one for each of the two sections, can then be filed in the office of the clerk of the circuit court of Palm Beach county in West Palm Beach. A plat is not accepted for record by the Palm Beach county registrar unless it is accompanied by an affidavit from the filer of the plat that he is the owner of the property plotted. This is a precaution to prevent anyone subdividing another person's property. In the present instance the State of Florida alone, as the owner of the lake shore property, can file for record a plat of the lake shore property, with or without the aid of our surveyor, without the aid of lot measurements of distances from the shore line.

From my list of owners' names in sections 13 and 18, Pahokee, I perfected Mr. Richardson's list. I drew his attention to the fact that the location of the state meander line was omitted as unnecessary in the map of section 13. The trustees' deeds already issued two years ago carrying the private ownership beyond the state meander line to the front lot line.

On the evening of the same day I sent a prepaid order to Mr. Fred C. Elbert, chief of the engineering department, for a blue-print of the original map of Ridgeway section 18, book 7, page 11. This evening I got that blue-print. Tomorrow morning I will take it over to Mr. Richardson.

Resuming the story of my interview with Mr. Richardson, I will add some details also for the information of other upland owners involved in the state sale of the other parts of Lake Okechobee shore. Mr. Richardson informed me that the sale by the state of about thirty miles of this shoreline, on the west side of the lake, is being considered, according to report from that city, one purpose being to give larger capacity for discharge of canal on the range line is the west boundary of Lake Worth drainage district. A feature of the plan for the new spillway is that it will assist control of water in that drainage district and in the city of West Palm Beach. Execution of the plan will depend on the distribution of the cost between the several parties at interest and the practicality of financing the construction.

NEW LOCATION FOR DAM W. P. B. CANAL

Construction of a spillway at a point in the canal near the line between ranges 41 and 42, about 12 miles west of West Palm Beach, is being considered, according to report from that city, one purpose being to give larger capacity for discharge of canal on the range line is the west boundary of Lake Worth drainage district. A feature of the plan for the new spillway is that it will assist control of water in that drainage district and in the city of West Palm Beach. Execution of the plan will depend on the distribution of the cost between the several parties at interest and the practicality of financing the construction.

MUST GIVE LOCAL AID TO WATERWAY

Gulf-Okechobee-Atlantic Assoc-
iation Is Advised By
Expert

Federal aid for a cross-state waterway is in jeopardy until conflicting routes have been reduced to one and considerable local aid has been given to the waterway route. W. W. Finera, waterway engineer of the Fort Myers Chamber of Commerce, stated at a meeting of the Gulf-Okechobee-Atlantic Waterway Association held Tuesday in the Southland Hotel at Okechobee. This view was adopted and the policy of the association will be modeled on that line.

W. P. Fagfin of Fort Myers was re-elected president of the association. C. L. Williams of Moore Haven was re-elected secretary, with Don P. Johnston of Okechobee as treasurer. W. L. Schuman of the Gulf-Okechobee-Atlantic Waterway Association held Tuesday in the Southland Hotel at Okechobee. This view was adopted and the policy of the association will be modeled on that line.

W. P. Fagfin of Fort Myers was re-elected president of the association. C. L. Williams of Moore Haven was re-elected secretary, with Don P. Johnston of Okechobee as treasurer. W. L. Schuman of the Gulf-Okechobee-Atlantic Waterway Association held Tuesday in the Southland Hotel at Okechobee. This view was adopted and the policy of the association will be modeled on that line.

U. S. BUYS LAND AT CANAL POINT FOR TESTING STATION

With Appropriation of
\$16,000 Made By Con-
gress 2 Years Ago

GROUND IS BROKEN
FOR TWO BUILDINGS

Service To Be Given To
Cane Sugar Industry
of the Nation

Payment for the site having been made by West Palm Beach, Tuesday, S. J. Thibodeaux & Company began this week for the two buildings for the U. S. Department of Agriculture cane-testing station at Canal Point for which an appropriation of \$16,000 was made by congress last year. The appropriation included cost of the site and of maintenance of the station.

The buildings to be erected are a laboratory 40 x 40 feet and a residence for the superintendent of the station, both of hollow tile which will be stuccoed.

Transfer of title to the United States Department of Agriculture was pending for a week. The delay was due to difficulty of meeting the rigid requirements of the department's legal staff.

The site is a plot of ground on the sand ridge fronting the lake and Conners Highway about 1500 feet north of the canal bridge. The cane-testing station land adjoins on the east. Purchase of the site was made from the Florida Sugar & Food Products Company.

Attorney George H. Hoffman of Washington, D. C., representing the solicitor of the Department of Agriculture, came to the site on Monday and met C. P. Sheffield, foreman of the station, and S. J. Thibodeaux, to whom a tentative contract for the building was given a year ago. He then returned to West Palm Beach and closed the deal for the purchase of the land by making the cash payment.

Station for testing varieties of cane sugar collected from all over the world was established on the site several years ago because of the soil and temperature of the region, both of which factors are the culture of sugar cane. Seedlings are grown to maturity here and record is made of the performance of the cane. The cane is then crushed and their juices analyzed. Until now the plot on which the seedlings were grown was not in the ownership of the Department of Agriculture and this limited the extent of the operations, the department not being disposed to exercise its plan to fill on land it had no assurance of controlling over a long term of years. With a tentative contract for the building, the chemist, it is expected the operation will be enlarged as well as made permanent.

City and District May Join For Drainage

WEST PALM BEACH, June 17.—Plans for drainage of the western area of the city, annexed last fall, will be discussed this morning at a joint meeting of the executive committee of the Greater Palm Beach Chamber of Commerce and official representatives of the city.

Owing to the absence from the city of C. A. Bingham, city manager, T. B. Henry, city engineer, will represent the city officials; Glenn Scott, assistant engineer for the Everglades drainage district and M. R. Kays, engineer for the Lake Worth drainage district, will also serve with Mr. Henry as an official committee.

At this meeting the proposed plan for draining this area by using the West Palm Beach canal for the surplus overflow, is to be thrashed out.

RESURFACING ROAD NO. 8 TO GLADES COUNTY LINE

SEBRING, June 15.—Resurfacing of state road No. 8 known as the Seismic Highway from Avon Park through Sebring to the Glades county line, was started this week.

The resurfacing and reconstruction project calls for an expenditure of \$287,000. The contract was awarded to the Standard Asphalt Company of Orlando. Between 50 and 60 men are working on the road, resurfacing having been started at Avon Park. The road will be resurfaced through Sebring, DeSoto City, Lake Stuart, Childs and to Hicoria. Between Hicoria and Venus reconstruction work will be carried out, the highway being widened from nine feet to 18 feet.

NO ADVERSE COMMENT: OUR BUSINESS TO WORK

"Everywhere I went I found people were interested in Florida and nowhere did I hear any adverse comment about the state," T. Reese of West Palm Beach, architect of the Farmers Bank & Trust Company, said on his return from a vacation trip to the Pacific coast. All two state lands are free to choose their own licensed civil engineer by competitive bid or otherwise as they would choose a contractor for any other piece of work which they want done.

INSPECT FROM TAMPA

TAMPA, Fla., June 14.—Scope of the United States steamboat inspection service here for the purpose of the arrival of Dickerson N. Hoover, supervising inspection general of the United States steamboat inspection service from Washington.

Heretofore inspection service on Lake Okechobee has been done partly by the Jacksonville and partly by the Tampa offices, but Mr. Hoover made it known yesterday that all this work from now on will be done by the Tampa office.

He explained that in giving the Tampa office full jurisdiction over the inspection of steamboats on the lake, conflicting regulations will be eliminated.

BOY CLUB MEMBERS

Boys from Palm Beach who attended the annual short course at Gainesville were Lee Andrews, F. Ford Rousseau, Harold Thiele, Boynton, Edwin Price, John B. Roberts, Herbert Fritz, Albert Hicks, Jr., Lake Worth, Rokno Wilson Kammy, Clifford Howard Purdon, Ross Rabin, Arnold E. Kirsch, Chosen, Norman S. McDaniel, West Palm Beach; Victor Reidel, Belle Glade.

NUISANCE BY MAIL

Patrons of the postal service are being subjected to a nuisance that ought to be stopped, the offense being by those mail order dealers who without order or authority send merchandise to persons whose names they obtain by means unknown. The unsuspecting patron of the post office having received the package in his mail, not wanting it, he is put to the trouble of re-wrapping it and returning it to the post office. If by any chance the package does not get back to the shipper, the victim is harassed by dunning letters.

A resident of Canal Point received an article that was represented as a necktie. He wrote to the postal authorities at Washington denouncing the practice of mailing goods not ordered but the Washington postal official did nothing more than acknowledge receipt of the letter. In the meantime the letters still come from the mail order firm demanding payment.

It is hard to believe that a reputable firm would resort to such a practice.

COLD AND FOOD

Government meteorologists do not credit long distance forecasting, but Herbert Janvira Brown predicts the North American continent will be snow-capped and blizzards will sweep the continent and the cold will be paralleled in intensity only by the cold weather of 119 years ago.

"The same oceanic changes that prevailed 119 years ago are now in evidence," Brown said. "We will have the severest winter ever known on the continent. America is practically surrounded by cold water and will be entirely by next year."

He said it has taken since 1922 for the cold waters to surround the continent.

In addition to forecasting the severe winter, Brown pointed out that next summer will be quite limited—just a few weeks of warm weather, he said. With the prevailing cold weather, Brown said, nations of the world food control to prevent starvation.

HOW TO ADVERTISE

Selling of land and climate and serving tourists are businesses in which Floridians have more experience than in any other business. They have experience the Californians handle both of the businesses better. It is wise for us to put our pride aside and confess this and learn from it.

Two years ago Floridians were acquainted themselves with the sound principles of community advertising, then came the "boom" with its seemingly easy money and the need for community advertising was forgotten. Now that the boom is over—thank heaven—promotion agencies are taking up again the subject of advertising for business, but many of the plans proposed and considered now are as foolish and futile as the plans proposed and considered three years ago.

This matter is suggested for editorial discussion by receipt of a booklet received from California, a booklet of the kind that might well be used in Florida. This piece of California literature describes "Scenic San Joaquin Valley and the California Sierras," an illuminating title. Note that it does not take in all of California (this observation being directed to the "All Florida" fans) but it does take in all of that part of California that has similar characteristics. A centerpiece may show a stretch of country of almost as great length as the Florida peninsula, extending from Stockton to Eureka, embracing ten counties. Think of that ten counties advertised and the expense borne by seven! Can that be done in Florida?

The commercial organizations in California are county organizations. Fresno, for instance, is quite a city, but it assents to a Fresno County Chamber of Commerce, and it spends money advertising the possibilities of adjoining counties, not hogging all of the representation.

In California it is conceded that an advertising man is not qualified to try law suits or prescribe for sick people; it is also conceded that lawyers, retail merchants and preachers can fairly defer to the views of advertising men in advertising men's diaries.

Business interests in Miami, West Palm Beach, Fort Myers and Fort Lauderdale might very well take in using literature on the California model.

All of the towns around Lake Okechobee—Canal Point, Pahokee, Chosen, Belle Glade, South Bay, Lake Harbor, Rella, Bare Beach, Clewiston, Moore Haven, Lakeport and Okechobee—will make progress this summer. Localities back from the lake like Geerworth and Oklahtala, also will show progress. When the Everglades dry it is in the money! Last winter but it's time is coming.

The Okechobee News gets itself on ground as opposed to the enlarging of Everglades drainage district so far as Okechobee county is concerned. It suggests that money derived from the sale of state land in the Everglades be used for drainage instead of more territory being taken in to get more taxes.

There never was a time as good as this for investments in the developed portions of the Everglades.

MAY SPOIL HIM?

Okechobee News: Our friend Howard Sharp, down at Canal Point, was elected county commissioner of Palm Beach County, as he does a newspaperman, then the people living along the eastern shore of Lake Okechobee will have some good roads before long, and they will be honestly built. Howard Sharp possesses great common sense and old-fashioned common honesty that had gotten out of fashion during the heyday of our hectic profession, but which is so badly needed in public life and will be found of considerable value during this period of readjustment. Our sincere hope is that this office-holding won't ruin a good newspaperman.

NICE, WE'RE SURE, BUT THIS LAID IT ON RATHER THICK

(From Florida Newspaper News)

Howard Sharp, editor and publisher of The Everglades News at Canal Point, is a candidate for county commissioner in his home district and all means he should be elected, for he is one publisher who is not afraid to "shoot in the oil well promoter."

Concerning his expose of one R. J. Brewton, oil promoter, the Fort Pierce Record says:

"From The Everglades News, a weekly newspaper which might well profit by the discovery of oil in Glades county, has come a stirring indictment of the methods employed in the opening of the Palmfield well."

"This little newspaper bravely states that Brewton's work is an abhorrent at Glades county, and attacks the record of Brewton in no uncertain manner."

"The Everglades News offers that it has documents to show that a company which Brewton was formerly associated with pursued similar methods in Walton county, Brewton being president of the 'not incorporated company,' and because the company was not incorporated, buyers of land became stockholders for the indebtedness of the company."

"It would seem that this weekly newspaper, with its little practical advice for such statements, should they be mistaken, knows whereof it speaks; and on a point of strength, the presentation of the case before the citizen body of this section, county officials of Glades county should give the matter the bottom to protect those who may have already invested in the enterprise, and who are on the verge of so doing."

"The Record, since the 'discovery of oil' in this section, has counseled deliberation and advised caution, until more information was available."

"The situation that came about in Okechobee was one for the honest and substantial people to do with, to protect their good names and the reputation of their town and state. It seems that it is being dealt with satisfactorily."

"And when the work of a newspaper for 1929 comes before the Pulitzer prize commission in its annual survey, it is surprising that this little weekly at Canal Point, far out in the hinterland, can come in for its share of honorable mention."

If the supreme court decision forbids duress, which is the case, why not the entertainment of tourists, why not the date of the primary election and have it in the winter season?

This suggestion was made by a man who was a candidate for the legislature and was defeated.

Brother Joe Bell found that Mr. Conkling isn't a man it is wise to associate with.

That Fort Myers boat, the City of Palms, that is to run between Fort Myers and West Palm Beach, will be more time to get it started than Tamiami Trail.

PAHOKEE, Fla., June 15, 1928.

Dear Mr. Sharp: I have some questions here that I would like to have somebody explain who knows something about them.

The dredge which threw up the grade for the Pahokee-Belle Glade road, out the lake bridge on its way to Pahokee on the 11th of this month. It finished its work and passed back through the lake.

Now this dredge did not go through the other two bridges out here but passed alongside them. My first question is, why did they come along shortly after the dredge passed and then they up? We live on the island in section 19 and our only outlet is by bridge; we have a car that we would like to get, and also some vegetables to ship, and if they had left this bridge out they did not need to tear out we would have had some way to get out, but now the only way is by boat and that is a job.

Mr. Bell said that after the dredge got out there would have a bridge inside of twenty-four hours. They have a small foot-bridge across now, but that could not be what Mr. Bell meant when he said that they would build a bridge.

We are not the only ones here who are inconvenienced by the delay of us live on the island in section 19, there is more farm on it, and there are several more people here, further back who are also practically cut off. We think we have as much right as anybody else to an outlet, and we do not know any reason why we should be delayed.

Respectfully,
AXEL JENSEN.
P. S. Congratulations on your nomination for county commissioner.

THE EVERGLADES NEWS, CANAL POINT, FLORIDA

FARM TALK

That non-resident owner who some months ago advertised that he would give the use of his land for a cropping season for the clearing of it, had a wrong idea about the cost of clearing the land in the custard apple belt, by the estate of W. A. Cuthill of Pahokee, who has been in the upper Glades since 1917 and around Florida for a still longer time and has had a good deal of experience in the clearing of land and as a farmer.

On land where the native growth is dense, a light clearing of the land at a cost of \$20 an acre, and on land where the growth is custard apple and mahoe, the cost will range from \$30 to \$75 an acre, and on land where the growth is custard apple and mahoe, the cost will range from \$30 to \$75 an acre.

More work may have to be done on some older land where the custard apple and rubber trees are still in the trees were standing. Occasionally, as on section 29, there is a vine the name of which is not known, but to which Mr. Cuthill has applied the term "delicious." The bad thing about this vine is that it is a good deal of trouble to get under the ground; sometimes, if a dense hogan can get through it, and where there is much of it the man who clears the land can figure that \$300 an acre isn't too much to get for getting rid of it.

Land has been cleared in the Canal Point-Pahokee district on the basis of two years use. This would seem to equal \$80 an acre, and in some cases it is gotten around by only partly clearing—taking the easiest and letting the rest go.

How much a man can afford to pay for the use of land is largely a matter of individual opinion, we judge, because it depends on how badly he wants to farm, where he lives and where the land is, how high or low the land is, its fertility or immunity from flood or drought and the market conditions at a certain season. I have heard farmers say they can't afford to buy land at \$800 to \$1000 an acre, but \$400 to \$600, and that it is cheaper to rent or share-crop than to own land. And on the other hand, some renters and share-croppers complain that the land owner gets too much, because the owner only gets a return of 10 per cent of the produce. One man of good judgment says the rate ought to be fixed by experience over a period of years, but conditions have been so varying that no one knows what an average condition will be in the future.

I suspect that land on the shore of Lake Okechobee which is in time coming to have a market value greater than its producing value. It is figured that farmers generally do not get a 5 per cent return on their land investment in addition to their labor—that is, farmers do not charge the land with the capital investment, because they think of the farm place as the home. If this is true generally, it is quite likely to be the case in the parts of the upper Glades that are in favorable temperature zone and have good roads and water control facilities. I apprehend that in the course of time there will be a good many people who will want to own homes here or occupy in winter and not care particularly whether they make enough out of their farming operations to supply all the money they need out of their expenses, because they will be persons of independent means, with investments elsewhere that will furnish the larger part of their income. If this is to be the case, men who expect to make all of their money out of trucking will have to compete with the other class when they try to buy land. This may run the price of land above its value on a producing basis, but if it does it will duplicate the experiences in many communities in California.

Whether it is a good outlook or a bad depends on the point of view of individuals.

Clifton Weaver, of Okechobee, has gone to Van Wert, Ohio, to care for his apathy there during the summer months. He has returned to Okechobee this fall to look after about 175 colonies of bees he has taken.

W. G. Stovall announces that he is going to plant 300 acres to truck on the lake side of camp where W. J. Conners is filling in the lake front. That there element is of more importance than clearing a state, because it is from this county, and it offers follow, this will be a great community of farmers by fall.

Non-resident owners who have waited 12 years or more for conditions that permit them to live on their tracts of Everglades lands that they own, wait much longer. Pumping plants, highways and railroads will supply all that has been lacking.

"The natives" in Collier county "rose" on June 8 but Colonel Collier's troops put down the uprising and a force of insurgents back into the reservation.

Some of the Everglades have been too much interested in the primary election campaign to notice what the League of Nations was doing. It is proper to say that they did not mind to 1000, 3626 to 3960, 750,000 to 1,000,000, 6501 to 6575.

Notice of Election

Whereas, heretofore, to wit, on the 12th day of May, 1928, a certain resolution was passed by the Board of County Commissioners of Palm Beach County, Florida, which said resolution was in the words and figures as follows: To-wit: Resolution of the Board of County Commissioners, Palm Beach County, Fla., May 12th, 1928.

Resolved, That the Board of County Commissioners of Palm Beach County, Florida, do hereby certify that the best interests of said county of Palm Beach, Florida, to issue county bonds of said county for the purpose of constructing paved, macadamized, or other hard surfaced highways in Palm Beach County, Florida.

Be It Resolved, by the Board of County Commissioners of Palm Beach County, Florida, that the bonds of the county of Palm Beach, Florida, in the amount of Eight Million Five Hundred Thousand (\$8,500,000.00) Dollars are

Bond Nos.	Par Value	Date of Issue	Date Due
1 to 50	\$50,000.00	July 1, 1928	July 1, 1932

2701 to 2850	150,000.00
2851 to 3000	180,000.00

FLORIDA'S FUTURE

After spending the month of May motoring over California I return home more enthusiastic than I have ever been as to the future of our great State, but our future lies in the development of the farm, orchard, vineyard, dairy, poultry and other agricultural industries.

I believe we can do EVERYTHING California has done, but we cannot do it with the seat of our pants in a big limousine or peddling lots on the moon.

WHO KNOWS whether or not we can produce cherries, apricots, plums, pears, peaches, walnuts and other products now produced in California? We know we can produce grapes, but we do NOT in quantity. California has hundreds of thousands of acres. ONE company has 450 thousand acres under cultivation.

Instead of spending a million in advertising to combat the anti-Florida propaganda I would suggest we spend half of it sending Floridians to California as an education as to our possibilities in an agricultural way as well as road building, and the other half seeking information as to what we can grow best and WHERE. From North to South I believe Florida has every sort of climate California has.

We seem to be unduly exercised over the anti-Florida advertising. I traveled from West Palm Beach to Vancouver, B. C., down the coast to San Diego, stopping in every important city, and read the daily papers and periodicals in every community and only saw one anti-Florida very short article, and it was an interview from a man who had come to California on the S. S. Alexandra from Miami. His comment referred ONLY to the real estate situation.

Did you ever stop to think, if you order prunes for your breakfast they come from California? Your peaches, apricots, pears, cherries, figs, raisins as well as other fruits. If you order from your grocer white or lima beans it is about eight to one they come from California. I saw thousands of acres of these beans growing. California even ships out the lowly onion all over the United States. JUST TRY TO THINK OF THE AMOUNT OF REAL MONEY Florida contributes to the success of California!!!

She produces all the poultry products she requires and plenty to ship to others. Florida sends out TWELVE MILLION DOLLARS per year for poultry products alone.

One can purchase THREE broiler chickens weighing a pound and a half each for 90 cents to one dollar for the three.

Vegetables she produces in great quantity. Lettuce 5 cents the head, young onions, dozen bunches for ten cents, beets, dozen bunches thirty-five cents, asparagus, five to six cents the pound, cherries and plums, three pounds for 25 cents.

The chances are you are eating cantaloupes from California at 25 cents per, and in California they are FIVE CENTS—and good ones. We should be producing and shipping out of Florida train loads of cantaloupes.

California has the finest system of roads of any state in the United States. Nearly all are reinforced concrete. I never saw a bad piece of road in California. We should send some of our road builders to California to learn something in road building.

We are far behind California in many ways. We have a far better winter climate, but she has a splendid all-year climate, and is now carrying on an "ALL-YEAR for California" advertising campaign. In May there were thousands of motor tourists in California. Californians are an enthusiastic, rustling people proud of their state, and so am I as a simple American citizen.

Hotel rates are much lower than in Florida and living costs are at least fifty per cent less. Rents are about one-third those in cities such as West Palm Beach.

We must get into quantity production along every line and bring down costs and get people in our State. PEOPLE, PEOPLE to cultivate the soil, produce poultry and dairy products. We send outside of our State twenty-four million dollars per year for dairy products when we should be shipping out millions of such products.

Our Agriculture Department reports we ship one car of products outside the State every six minutes. We ought to be sending out SIX CARS every minute.

California admits we have the best of them if we only take advantage of it from our nearness to the center of population of the United States.

We were producing Avocado pears before California ever heard of them, but today they are far ahead of us and have forty-five hundred acres under cultivation—JUST STARTING. They are going about it in a scientific manner and endeavoring to produce pears every month in the year. They are experimenting with FOURTEEN different varieties. I saw them on fruit and vegetable stands in Los Angeles priced SIXTY CENTS each, and very small. This is a product we excel in and should take advantage of it.

Compare conditions under which Californians labor. EVERYTHING they grow must be done under irrigation, even down to the lowly onion, and the cost for water is often more than the cost per acre for land in Florida.

Florida can produce more products per acre, and at less cost than any place in the United States, but we do not do it in quantity.

Few, perhaps, know that We, Farmers Bank & Trust Company, are farmers, and I am sure the most successful in the United States. On a 260-acre farm near Pompano we the past season NETTED the tidy sum of SEVENTY THOUSAND DOLLARS. Our best previous record was FIFTY-TWO THOUSAND for the season 1923-24. Our average NET for the past four years is THIRTY-TWO THOUSAND FIVE HUNDRED DOLLARS. Where else but in Florida is that done? We dare say we are the only farmers with a set-up working capital of \$25,000—CASH, all the time.

I could write on and on of our future and the wonderful possibilities, but just let us turn our attention to the worth-while things and the bringing into Florida people who will work the soil.

FORGET what people in less fortunate communities are saying about us and GET TO WORK.

T. T. REESE, President,
Farmers Bank & Trust Company

About 1885 Los Angeles had a population of eighteen thousand, about the same as Jacksonville. Today Los Angeles has a population of more than a million, nearly as much as the entire State of Florida.

Los Angeles has TEN fine boulevards running from the city to the beach.

Los Angeles has to bring her water supply a distance of 240 miles.

York's Clearance Sale

A new lot of beautiful dresses, in Georgettes, Flat Crepes, Voiles and Rayons.
Underwear—Princess Slips, Gowns, Teddies, 98c
Hosiery—Men's, Women's and Children's,
Royal Society Packages and Threads.
Bedsteads, Cots, Chairs, Mattresses and Pillows, all reduced.

JUDGES AWARD PRIZES TO SHEFFIELD'S BEST LETTER

The prize of \$5 offered by Olaf Boe
for the best statement of why Howard
Sharp should be elected county commis-
sioner from the fifth district of Palm
Beach county was awarded by the
judges to C. P. Sheffield of Canal
Point.

Mr. Sheffield's letter follows:
"The reason Howard Sharp should
be elected county commissioner from
the fifth district of Palm Beach county
is that he is well informed as to what
the people want and need and he has
the ability and courage to go after
what he believes to be to the best in-
terest of the whole district."

Although only one prize was offered,
a letter written by Byron Todd of Canal
Point was deemed worthy of a place
and an award of \$2 was made to him.
Byron is the 11-year-old son of Mr.
and Mrs. W. G. Todd. This was his
letter:

"Mr. Sharp for commissioner: He's
half-headed and brainy; editor of the
paper—knows what is needed, the build-
ing of roads; he has lived here for
some time, is well known and well
advertised."

The letters were judged and the
awards made by A. L. Pope, Bob
Schroeder and O. P. Griffin.

SCHOOL BONDS

Approval of the proposed \$80,000
bond issue was given by the board of
directors of the Greater Palm Beach
Chamber of Commerce. On the list of
proposed buildings is an item of \$50,000
for Pahokee.

Ten acres with canal frontage at
South Bay. For price and terms see

THERE IS NEWS IN THE 'ADS'

ANNOUNCING RAILROAD ADDITION TO PAHOKEE

ANNOUNCING RAILROAD ADDITION TO PAHOKEE

A Retail and Wholesale District to Serve
the Pahokee Region:

A few of the lots to be offered immediately at reduced
prices.

It is anticipated that early next fall the Belle Glade-Pahokee

Road and the Florida East Coast Railroad will be completed
through the property, at which time the plat will be offered
with all lots at an increase in price.

Those familiar with the district will realize that these lots
are very desirable for wholesale and retail business.

Pahokee is a thriving town and this addition is its railroad
center.

The main highways leading into the most productive
regions of the Everglades Muck Lands cross at this center.

Abstracts and clear titles will be furnished to the pur-
chaser by the Owners and Developers.

Purchasers wishing to take advantage of
this first offering, may see either W. H.
VANN, at Canal Point, or THE RIDDLE
ENGINEERING COMPANY, of West Palm
Beach, or DR. W. H. LAIR, of Pahokee.

CANAL POINT

LOST—Between ice plant and Sand
Ct. automobile license tag and 3-
light. Finder please return to C. C.
Hall at Sand Cut, Canal Point, Fla.

Miss Betty Burford is taking the
summer short term course at the
Women's College at Tallahassee. She
left for Tallahassee Saturday, going by
way of Okeechobee.

John Thomas, who has been on the
Jones Furniture Company's sales force
for several months, is taking a month's
vacation and spending part of the time
in Canal Point.

L. W. Jennings and Mr. Pancoast of
Okeechobee last week brought two
agents of the Federal Land Bank to
Canal Point to show how sub-drainage
districts' plans are arranged and
handled.

Church services will be held Sunday
at the M. E. church. Morning service,
10 a. m., evening service, 8 p. m. Ser-
mons will be delivered by Rev. P. C.
Filly, who has been appointed to fill
this pulpit.

J. W. Samworth and wife left last
week for Pomeroy, Pa., where he will
work in a dairy. His wife is a daughter
of E. Erickson. They will go north by
way of St. Petersburg and Wilmington,
Del.

Mr. and Mrs. Fred J. Taylor will
leave next week for the Georgia peach
district, where he will work in the deal.
When the peach shipping season ends
he will join Mrs. Taylor at a summer
resort.

A. W. Dutch of West Palm Beach, fire
warden, passed through Canal Point
the latter part of last week on his way
home from Okeechobee. He said he
had been looking after preparations for
combating fires in the flatwoods as
well as in the muck sections of the Ever-
glades.

This office acknowledges the courtesy
of L. W. Thompson who left a large
watermelon for the force. He lives on
the Culp place now owned by the Ex-
otic Gardens. We'd like to say that
the melon was grown "on the ridge"
but truth compels the admission that
it was grown at Millberry.

Rev. and Mrs. P. C. Filly and daugh-
ter, Mrs. Ruth Wible and daughter were
in Canal Point Wednesday looking for
living quarters. Rev. Filly has been
appointed to the M. E. church charge
here and will make it their home. They
came from Herndon, Va., motorine to
West Palm Beach two weeks ago.

C. R. Drigham returned Monday from
Georgia where he had motored two
weeks earlier with his family. He will
return to Georgia in a few weeks to
accompany his family home.

A. N. Kennedy of Lake Worth with
Grant Van Valkenberg and son, spent
a few hours here Tuesday looking into
the possibility of cultivating a tract of
land Mr. Kennedy owns in section 33.

To take the eight-weeks training
course in a school conducted by the
Kohler Company, Olat Box left via
Okeechobee City and the Seaboard
Saturday night for Atlanta, Ga. On the
completion of the course, unless he
changes his mind, he will become a
salesman for Kohler light and power
plants, one of which he bought for the
restaurant where he engaged in business
in the Glades hotel building several
months ago. "Olat" has a knack for me-
chanics and will make a success of his
new undertaking.

SPECIAL NOTICE

In order that we can render a more efficient service to our Pat-
rons, Our Business will be operated Strictly for Cash in the future
beginning July 1st. It is no reflection on your standing, but we do
respectfully ask that you do not ask for credit.

CANAL POINT GARAGE

J. W. RUSSELL, Manager.

CANAL POINT, FLA.

TRACK FOREMEN

The track foremen for the Kershaw
Contracting Company are Mike Num-
mely and Mr. Lovell. Mr. Nummely is
in charge of the surfacing and Mr. Lov-
ell is in charge of laying steel. Mr.
Nummely expects to bring his family
here from Springfield, Tenn., this fall
and have his four boys help him farm.

local thunderstorms during the latter
half, moderately warm.

STATE PLEDGES AID TO

EVERGLADES SURVEY

TALLAHASSEE, June 15.—The
board of commissioners of the Ever-
glades drainage district in a message
to Secretary of Interior Hubert D.
Work, pledged the cooperation of Flor-
ida in the government's proposed en-
gineering and economic survey of the
Everglades.

The board's action was taken fol-
lowing receipt of a telegram from Hor-
ace C. Stillwell, editor of the Fort
Lauderdale Daily News, who advised
that Mr. Work was about to order the
survey to be held under the supervision
of Ellwood Meade, commissioner of the
bureau of reclamation.

DESCRIPTIVE

A rich, very eccentric man died.
The clergyman, who was young and
new to the parish, thought it a fitting
opportunity to call and comfort the
widow.

"You must not grieve," he told her.
"The body that lies there is not your
husband. It is merely a husk, an empty
shell; the man has gone to heaven."
Wall Street Journal.

If you wish to buy good truck land
on south or east side of Lake Okeecho-
bee get in touch with me as I have five
tracts close to lake and good road.—
F. H. Friedman, Chosen, Fla., Licensed
Broker.

WON THE BALL GAME

The Canal Point-Pahokee base ball
team won Sunday at Sherman from
Sherman by a score of 13 to 11. Lee
Mansfield and Bill Cochran pitched
with John Thomas catching. As John
was behind the bat, Paul Mansfield
played at first and Francis Cross at
second. Henry Larimore held down
third base and Dan Griffith was in
right field. Sims, in center, Carr in
right and Thornton played short stop.

NOTICE OF APPLICATION FOR

TAX DEED

Under Section 777 of the Revised Gen-
eral Statutes of Florida.

Notice is hereby given that P. J.
Johns, purchaser of Tax Certificate No.
2367, dated the 4th day of August, A.
D. 1919, has filed said certificate in my
office and has made application for tax
deed to issue in accordance with law.
Said certificate embraces the following
described property, situated in Palm
Beach County, Florida, to-wit: Lot 6
block 265 Town of Lake Worth as re-
corded in plat book 2 pages 29 to 30.
The said land being assessed at the
date of the issuance of such certificate
at the sum of Stewart E. Looney. Un-
less said certificate shall be redeemed
according to law, tax deed will issue.
